DETAILED ACTION

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

The Prior Art does not fairly teach or suggest a pressure sensor having the *combination of* features claimed nor the associated *combination of* steps in method of making claimed, in particular a pressure sensor having a pressure receiving part with a deposition electrode formed *on each* of the opposing surfaces of sapphire diaphragms which are provided in opposing relation to each other, and a securing part with a metal deposited on a portion of the surface of each of the sapphire diaphragms; a metal base for securing the pressure sensing element at its securing part; sealing a gap between said securing part with a deposited metal and said metal base; and a conductive sealing agent for a nickel protective layer for protecting at least said conductive sealing agent from a is to be measured; medium whose pressure whereby a measured pressure of the medium is transferred to said pressure-receiving part, and the resulting variations in a distance between the deposition electrodes formed on the opposing faces of the sapphire diaphragms cause a change in capacitance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
